PROFILE

Analytical and detail-oriented **Data Analyst** with hands-on experience in data collection, cleaning, analysis, and visualization using **Python, SQL, Power BI, and Excel**. Proven ability to transform raw data into actionable insights, improve reporting efficiency through automation, and support KPI tracking. Strong foundation in **statistics, machine learning, and data-driven decision-making**, with a keen interest in applying data science within the **banking and financial services sector**. Highly motivated, proactive, and eager to contribute to real business challenges.

SKILLS

Technical Skills

Data Science & Analytics

- Data Collection, Cleaning & Preparation
- Exploratory Data Analysis (EDA)
- Data Quality, Validation & Governance
- Statistical Analysis & Regression
- Machine Learning (Scikit-learn)
- Data Visualisation (Power BI, Excel Dashboards)
- Data manipulation & analysis in Python (Pandas, NumPy)

Reporting & Governance

- Dashboard development & KPI tracking
- Reporting automation
- Data documentation & workflow optimisation
- Ensuring data consistency, integrity & accuracy

Tools & Technologies

- SQL (queries, joins, aggregations)
- Pandas, NumPy, Matplotlib
- Power BI, Excel (Pivot Tables, formulas)

Soft Skills

- Strong analytical thinking and attention to detail
- Effective communication of technical insights to non-technical stakeholders
- Collaborative team player with experience working across departments
- Excellent problem-solving and critical thinking abilities
- Strong time management and ability to meet deadlines
- Adaptable and quick to learn new tools and technologies

Projects

Customer Churn Prediction Model

- Developed a classification model using **logistic regression (Scikit-learn)**
- Cleaned and prepared data, improving model readiness and accuracy
- Evaluated model performance using **accuracy, precision, recall, and confusion matrix**
- Delivered insights to help identify customers at risk of churn

Retail Sales Performance Analysis

- Analysed sales datasets to identify **revenue trends and cost drivers**
- Built interactive **Power BI dashboards** to monitor KPIs
- Applied **regression analysis for forecasting** and business planning
- Provided actionable insights to support strategic decision-making

WORK EXPERIENCE

Junior Data Analyst, <i>Forvis Mazars - Global audit, advisory, and financial consulting firm</i>	06/2025 – 05/2026 Cape Town, South Africa
• Collected, cleaned, and validated large datasets using Python and SQL, ensuring high data accuracy • Developed Power BI dashboards and Excel reports to track KPIs and business performance • Automated recurring reporting processes using Python, reducing manual effort • Conducted data analysis to identify trends, patterns, and inefficiencies • Collaborated with finance and operations teams to deliver actionable insights • Maintained data consistency through structured validation and governance practices	
Key Achievement: • Improved reporting efficiency by automating workflows and enhancing data validation processes	

EDUCATION

Postgraduate Diploma in Application Technology, <i>Cape Peninsula University of Technology</i>	02/2025 – 12/2025 Cape Town, South Africa
Adv Dip in ICT in Application Technology, <i>Cape Peninsula University of Technology</i>	01/2023 – 12/2023 Cape Town, Completed
Dip in ICT in Application Technology, <i>Walter Sisulu University</i>	02/2022 – 11/2022 East London, Completed
National Senior Certificate, <i>NTukayi Senior Secondary School</i>	01/2017 – 12/2017 Bizana, Completed
