Dear Hiring Manager,

I am writing to express my strong interest in the Data Science Graduate/Internship opportunity within your organisation. With a solid academic background in Application Technology and hands-on experience as a Junior Data Analyst, I am eager to contribute my analytical skills, technical expertise, and passion for data-driven decision-making in the banking industry.

In my recent role at Forvis Mazars, I gained practical experience in collecting, cleaning, and analysing datasets using Python and SQL, ensuring high levels of data accuracy and integrity. I developed Power BI dashboards and automated reporting solutions, which improved reporting efficiency and enabled stakeholders to make informed decisions based on real-time insights.

I have also worked on projects such as a Customer Churn Prediction Model and Retail Sales Analysis, applying machine learning, statistical analysis, and data visualisation to solve real-world business problems.

I am highly motivated, detail-oriented, and eager to grow within a dynamic banking environment. I would welcome the opportunity to contribute to your team and further develop my skills.

Thank you for considering my application.

Yours sincerely,

Miyakazi Mafuduka
